Plastic Slate Roofing!

THE COMBINATION OF PULVERISED HHE COMBINATION OF PULLVERISED alate and viscons matter as a roofing material stands unrivalled. A mastic—it adapts itself to every shape and slope. It is non-combustible, impervious, non expansive, and undecaying. Frost does not crack, nor heat dissolve it. The only roofing material ever discovered that will resist the action of the elements as long as as the structure it protects. For repairing old and preserving new metallic roofs of all kinds, Plastic Slate has never been equalled, while it has proved an invaluable acquisition to the mechanic arts as a preserver of metal and wood when imbedded in water or earth, or exposed to the weather. Being susceptible of little, if any wear from exposure, and perfectly first of the control of the mechanic and control of the mechanic and control of the weather.
